

What kind of Boulay Fabrication, Inc. control panel do I have?

This guide will help you find and understand important information about your panel. If you need to contact our support team, knowing these details will allow us to assist you as quickly as possible.

1. Open panel door

Loosen the screw(s) on the front door of the panel with a screwdriver and open the enclosure door.

2. Find ratings label

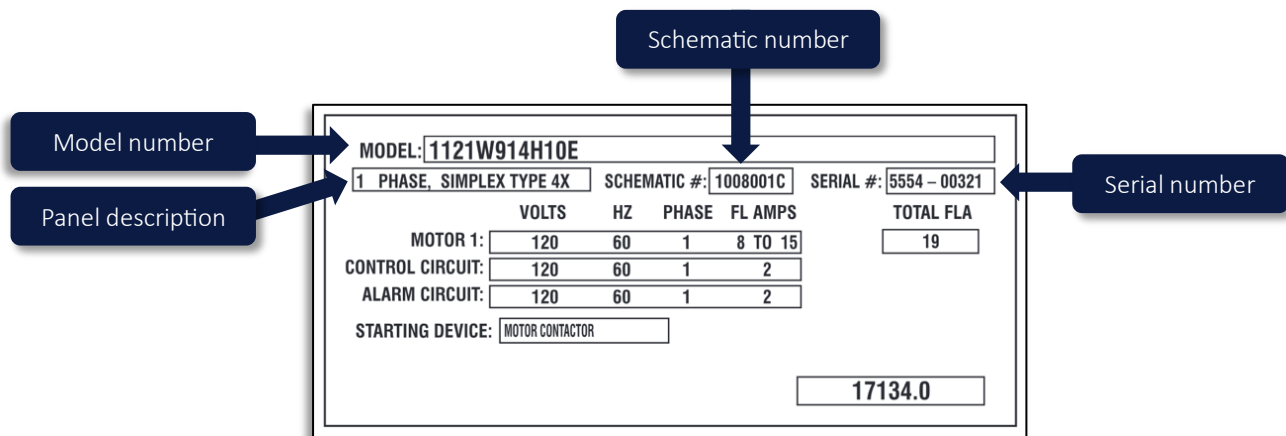

Your ratings label is a white label located:

- on the inside of the enclosure's front door; or
- on the inside edge of the enclosure.

3. Review ratings label

Most information about your control panel is located on the ratings label.

Look for the (1.) **model number**, (2.) **panel description**, (3.) **schematic number**, and (4.) **serial number**.

4. Understand ratings label

All of these items help our support team identify the following information about your panel:

- **Model number:** The standard type of Boulay Fab product you have
- **Panel description:** The basic summary of your panel's electrical controls and what systems they control
- **Schematic #:** The unique electrical plans and drawings used to build your panel
- **Serial #:** The unique identity of your panel, including date of purchase, date of build, location of build, customer sold to, etc.

5. Contact our support team

If you encounter any issues with your Boulay Fabrication, Inc. panel, please provide these details to our technical support team, who will be happy to assist you at 315-677-5247.
